Lino Lakes

Welcome to Centennial Utilities

We would like to welcome you to Centennial Utilities services. This letter will provide you with some basic information about the Centennial Utilities.

Centennial Utility Offices: Centennial Utilities offices are located at 200 Civic Heights Circle in Circle Pines and are open from 8:00 a.m. to 4:30 p.m., Monday through Friday. Phone number is 763-784-6751. Website www.centennialutilities.com.

About Centennial Utilities: Deriving from the "cooperative lifestyle" of Circle Pines forefathers, Centennial Utilities was formed to provide the community with its own natural gas needs. Currently, Centennial Utilities serves customers in Circle Pines, Lino Lakes, and Blaine. Centennial Utilities has a Board of five Commissioners who meet monthly on the third Wednesday of the month at 4:00 p.m.

General Service Information-Centennial Utilities provides natural gas to its customers. Bills are sent to customers monthly on the 10th of the month and are due on the 25th of the month. Centennial Utilities currently has a remote meter reading program. Centennial Utilities also provides no labor charges for appliance services.

Note to Customers who own underground private gas lines: Customer-owned lines that are located after the gas meter and are underground running to an adjoining building or gas grill or other gas appliances, may be a hazard. These lines have a potential to corrode and result in a gas leak. Individuals with these underground lines are responsible for maintaining them. Steel lines need to be cathodically protected to avoid corrosion. Copper and other lines may also be subject to decay. It is extremely important that if you smell gas outdoors where these lines exist, you should call Centennial Utilities to investigate.
