Re: **Construction Schedule**
2015 Street Improvement Project – Partial Reconstruction

The City Council awarded the construction contract for the 2015 Street Improvement Project at their regular Council meeting on June 9, 2015. The project was awarded to the low bidder, Midwest Asphalt Corporation. An informational open house regarding the project was held on Wednesday, June 24 at Circle Pines City Hall. While it was not possible for everyone to attend this meeting, we are sending this letter to provide information that was discussed at the open house. This notice includes an update on the construction schedule.

The Contractor plans to start on work on the partial reconstruction streets in early July. The tentative schedule for the work is included below.

1. Bituminous pavement removal – week of July 6
2. Curb removal and replacement – mid-July
3. Fine grading and gravel base – late July or early August
4. First lift of bituminous pavement – early August
5. Storm structure improvements and adjustments – early August or mid-August
6. Second lift of bituminous pavement – mid-August
7. Clean-up and punch list – late August or early September

These dates are subject to change and are weather dependent.

The Contractor will begin construction on Canterbury Road. The milling is expected to be done from School Road to 87th Avenue. Once streets are milled, they will essentially be gravel streets. Please slow down.

We will also be mailing weekly (or as needed) construction newsletters to you detailing the current week's construction activities and the upcoming activities as well as other pertinent construction information. You can also find information on our website www.ci.circle-pines.mn.us under Street Projects, 2015 Rehabilitation Project.

While construction typically represents an inconvenience, we will strive to minimize the impacts to you and ask for your patience during construction. Thank you in advance for your cooperation in making this a successful project.

(Over)

The City's engineering consultant, WSB & Associates, Inc., will coordinate the management and construction of the project. Jim Klein is the on-site Construction Observer and will be on the jobsite every day throughout the project. Jim can be reached at 612-518-8327 or by email jklein@wsbeng.com to answer any construction coordination or scheduling issues that you may have. Jeff Row is the Project Engineer and can be reached at 320-249-2910 or by email jrow@wsbeng.com. If you have any further questions, please feel free to call City Hall at 763-784-5898.
