RE: NOTIFICATION - Survey Crew to Begin Surveying Proposed 2012 Street Project Area

Dear Resident:

The City Council at their last meeting authorized a feasibility study by WSB & Associates to determine if the proposed 2012 street project, including Pine Drive, Duen Way, Inner and Circle Drives, is feasible. The first step in that process is to begin to gather data on the project so that we have good information for a decision. No final decision has been made at this time.

As part of the preparation of the feasibility report, the city's engineering consultant WSB & Associates will request locates for telephone, electric and other underground utilities to mark the location of their infrastructure. In addition, WSB & Associates' survey crews will be in the area to collect location data within the public right-of-way. The survey crew will be from WSB & Associates in clearly marked vehicles to conduct the collection of data for the engineering survey.

This survey and information gathering is used in preparation for the draft feasibility report that will provide information for the neighborhood open house on the proposed project. It is anticipated the open house will be held in January 2012. You will receive notification of the neighborhood open house when a specific date has been determined.

If you have any questions, please call city hall at 763-784-5898.

Sincerely,

James W. Keinath
City Administrator
