October 10, 2018

Dear Golden Lake Road Residents,

The City is in the process of building an Iron Enhanced Sand Filter (IESF) with a \$460,000 grant from the Clean Water Legacy Funds which are controlled by the State of Minnesota Board of Water and Soil Resources. This IESF will improve the water quality in Rice Creek, Golden Lake and the Rice Creek Chain of Lakes. The IESF will be located adjacent to your property on the city ground next to the storm water treatment pond by Heritage Commons Park.

The contract has been awarded to G.F. Jedlicki, Inc. The tentative construction schedule is the following:

1. End of October – Clearing and grubbing of trees – Projected to start after October 22nd
2. November – Common excavation, irrigation piping and sand filter installation
3. December – Continue work as weather permits
4. January & February – Winter shutdown
5. March – Install lift station
6. April – Finish up work on IESF
7. May – Begin operation of IESF
8. Spring/Summer – Install trees and shrubs

Please contact me via email: pantonen@ci.circle-pines.mn.us or phone: 763-784-5898, if you have any questions regarding this project.

Once again, the project is funded 90% through grants and 10% through storm water utility funds. There will be no individual assessments to the property owners as this project benefits the entire community.

Regards,

Patrick Antonen
City Administrator
